

THE HAUSKEN SILENCERS AT A GLANCE:

JAKT

THE HUNTING ALL-ROUNDER

WHISPER

THE MAGNUM MASTER

MINI

THE SMALL AND EFFICIENT

HAUSKEN JAKT

THE HUNTING ALL-ROUNDER

The lightest and most innovative over-barrel silencer, designed specifically for all hunting scenarios around the world. The weight, length and effectiveness of these models are ideally coordinated and perfectly matched with the needs of active hunters. Equipped with hard-anodised inner and outer tubes, JAKT silencers are especially durable. The diameter of 45/50/60 mm achieves balanced silencing of up to -38 dB, while the rifle remains accurate and unbeatably easy to handle even when in motion. JAKT series models are available in a variety of colours to add a personal touch and contemporary look. JAKT JD151-224, JD151-224X, WD60, WD60X silencers are not suitable for guns with open sights. The maximum permissible external barrel diameter is 23 mm.

Available in calibre-optimized length, diameter, colour and design variations:

Model	Length	Weight	Barrel extension	Diameter	Silencing (up to)	Design
JAKT JD151	151 mm	220 g	67 mm	50 mm	-23 dB	Over-barrel
JAKT JD151X XTRM	151 mm	250 g	67 mm	50 mm	-25 dB	Over-barrel
JAKT SK156 SUPER KOMPAKT	156 mm	280 g	156 mm	50 mm	-28 dB	On-barrel
JAKT SK156X SUPER KOMPAKT XTRM	156 mm	320 g	156 mm	50 mm	-29 dB	On-barrel
JAKT JD184	184 mm	260 g	100 mm	50 mm	-27 dB	Over-barrel
JAKT JD184X XTRM	184 mm	300 g	100 mm	50 mm	-31 dB	Over-barrel
JAKT JD224	224 mm	300 g	140 mm	50 mm	-31 dB	Over-barrel
JAKT JD224X XTRM	224 mm	360 g	140 mm	50 mm	-34 dB	Over-barrel
JAKT JD224L LITE	224 mm	290 g	140 mm	45 mm	-30 dB	Over-barrel
JAKT JD224LX LITE XTRM	224 mm	330 g	140 mm	45 mm	-34 dB	Over-barrel
JAKT WD60 WHISPER	224 mm	440 g	140 mm	60 mm	-35 dB	Over-barrel
JAKT WD60X WHISPER XTRM	224 mm	480 g	140 mm	60 mm	-38 dB	Over-barrel

HAUSKEN WHISPER

THE MAGNUM MASTER

Whether XTRM or MEGA XTRM, the WHISPER series is particularly robust and very compatible with strong long distance actions and magnum calibers! Compatible with barrels up to 30 mm thick and very well suited for larger calibers and long distances. In addition, distinguished by perfect magnum suitability. Due to the 70 mm diameter and their weight, the models are absolute giants on the civilian silencer market, still, due to the sophisticated over-barrel construction based on the barrel, the weapon extension of 144-229 mm is relatively small. The user benefits from absolute stability as the recoil is very well minimized by these giants. The ear protection has a maximum sound pressure level reduction of up to -43 dB, since the muzzle bang noise is almost completely "swallowed" in the large pressure distribution chambers. This puts the focus on precision and concentration, while you stay on task. With WHISPER, the power of stillness can be mastered particularly effectively!

All data are approximate values and peak values measured several times on average. Mistakes cannot be excluded.

XTRM: THE XTRM STEEL MESH GUARANTEES A SIGNIFICANT PLUS IN SILENCING PERFORMANCE.

Available in calibre-optimized length variations:

Model	Length	Weight	Barrel extension	Diameter	Silencing (up to)	Design
WHISPER WD228X XTRM	228 mm	600 g	144 mm	70 mm	-37 dB	Over-barrel
WHISPER WD306X XTRM	306 mm	770 g	144 mm	70 mm	-38 dB	Over-barrel
WHISPER WD356X XTRM	356 mm	860 g	144 mm	70 mm	-38 dB	Over-barrel
WHISPER WD406X XTRM	406 mm	900 g	144 mm	70 mm	-39 dB	Over-barrel
WHISPER WD456X XTRM	456 mm	1000 g	144 mm	70 mm	-39 dB	Over-barrel
WHISPER WD506X XTRM	506 mm	1000 g	144 mm	70 mm	-40 dB	Over-barrel
WHISPER WX456 MEGA XTRM	456 mm	1190 g	292 mm	70 mm	-43 dB	Over-barrel
WHISPER WX506 MEGA XTRM	506 mm	1290 g	292 mm	70 mm	-41 dB	Over-barrel
WHISPER WX556 MEGA XTRM	556 mm	1330 g	292 mm	70 mm	-42 dB	Over-barrel
WHISPER WX606 MEGA XTRM	606 mm	1420 g	292 mm	70 mm	-43 dB	Over-barrel
WHISPER WX656 MEGA XTRM	656 mm	1480 g	292 mm	70 mm	-43 dB	Over-barrel

HAUSKEN MINI

THE SMALL AND EFFICIENT

With diameters of 35 and 45 mm, the MINI series is the smallest in the high-quality HAUSKEN silencers collection. The on-barrel design for the use of open sights, the compact construction and the low weight make them efficient companions even in very active applications. Despite the minimal barrel extension of 128 mm, the user benefits from a significantly reduced muzzle blast noise of over -22 dB. Better precision and a qualitative technical experience guaranteed! Protect your ears and those of your hunting team from painful noise levels.

Available in calibre-optimized diameter variations:

Model	Length	Weight	Barrel extension	Diameter	Silencing (up to)	Design
MINI MD35	128 mm	200 g	128 mm	35 mm	-20 dB	On-barrel
MINI MD45	128 mm	200 g	128 mm	45 mm	-22 dB	On-barrel

All data are approximate values and peak values measured several times on average. Mistakes cannot be excluded.
