

# HAUSKEN SILENCERS

HAUSKEN has specialized in the development and manufacturing of moderators since 1992 – offering more than thirty years experience. HAUSKEN silencers are manufactured on the most modern machines available. All parts are hard anodized for maximum durability. The sophisticated design, precise manufacturing and high-quality materials guarantee a maximum of sound moderation while maintaining low weight and compact dimensions.

## HAUSKEN ACCESSORIES

**MASTER THE POWER OF STILLNESS**

### THE PERFECT MATCH FOR HAUSKEN SILENCERS

The rugged two-piece quick-change adapter for extremely fast and reliable mounting, dismounting and changing of silencers on hunting and sport rifles. The adapter is compatible with all HAUSKEN silencers with an M18x1 internal thread and, thanks to the centring cone and additional O-ring, enables secure and absolutely precise mounting of the silencers without changing the point of aim. The multi-start thread only needs a 90° twist to attach and detach the silencer. The adapters are crafted from aluminum bronze, chosen for its exceptional hardness and strong resistance to corrosion. Additionally, this alloy boasts notably superior sliding properties compared to numerous other alloys.
