

# HAUSKEN SILENCERS

HAUSKEN has specialized in the development and manufacturing of moderators since 1992 – offering more than thirty years experience. HAUSKEN silencers are manufactured on the most modern machines available. All parts are hard anodized for maximum durability. The sophisticated design, precise manufacturing and high-quality materials guarantee a maximum of sound moderation while maintaining low weight and compact dimensions.

MASTER THE POWER OF STILLNESS

### JAKT JD224Ti HYBRID TITAN

A CONSUMMATELY VERSATILE HUNTER – OPTIMISED TO HANDLE EXTREME LOADS

The tried-and-tested JD224 from the HAUSKEN JAKT product line, loved by many the world over, now also comes in an exceptionally durable titanium core variant. The JAKT JD224Ti HYBRID TITAN silencer offers unsurpassed quality, performance and practicality. Thanks to its hard-anodised and reinforced aluminium housing, as well as its indestructible grade 5 titanium core, the silencer is also suitable for magnum calibers and rapid bursts of fire. This means that it can now finally be used at a simulator or shooting range! The 50-mm diameter allows for optimal gas distribution inside the silencer, thus ensuring a balanced sound pressure level reduction of around -30 dB, while the rifle, thanks to a barrel extension of just 140 mm and the tried-and-tested HAUSKEN over-barrel design, continues to offer precise and easy handling, even when moving.

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.

[dB\*] The measurement for all silencer models was carried out in reference to the calibers .22 l.r. | .308 Win | .300 Win. Mag. The highest value determined per product line is indicated.

[i.O.] individual order.
