

HAUSKEN SILENCERS

HAUSKEN has specialized in the development and manufacturing of moderators since 1992 – offering more than thirty years experience. HAUSKEN silencers are manufactured on the most modern machines available. All parts are hard anodized for maximum durability. The sophisticated design, precise manufacturing and high-quality materials guarantee a maximum of sound moderation while maintaining low weight and compact dimensions.

JAKT: Available in calibre-optimized length, diameter, colour and design variations:

Model	Length	Weight	Barrel extension	Diameter	Silencing (up to)	Design
JAKT JD151	151 mm	220 g	67 mm	50 mm	-23 dB	Over-barrel
JAKT JD151X XTRM	151 mm	250 g	67 mm	50 mm	-25 dB	Over-barrel
JAKT SK156 SUPER KOMPAKT	156 mm	280 g	156 mm	50 mm	-28 dB	On-barrel
JAKT SK156X SUPER KOMPAKT XTRM	156 mm	320 g	156 mm	50 mm	-29 dB	On-barrel
JAKT JD184	184 mm	260 g	100 mm	50 mm	-27 dB	Over-barrel
JAKT JD184X XTRM	184 mm	300 g	100 mm	50 mm	-31 dB	Over-barrel

HAUSKEN JAKT

MASTER THE POWER OF STILLNESS

THE HUNTING ALL-ROUNDER

Ideally balanced length, weight, diameter. The lightest HAUSKEN over-barrel product line. With 50 mm diameter in the standard version, for balanced sound attenuation. Up to -38 dB sound pressure level reduction (JAKT WHISPER XTRM WD60X). Available in various colors as well as JAKT HYBRID TITAN (with Grade 5 titanium core), JAKT Lite (45 mm), JAKT XTRM (with steel core), JAKT SUPER KOMPAKT (compact on-barrel version) and JAKT WHISPER (60 mm). The right choice for hunting according to the hunting rules! Optimized precision, good hearing protection, reduced muzzle flash and less recoil!

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.

MASTER THE POWER OF STILLNESS

Slimmer, lighter and effective! Outstanding silencing power of up to -30 dB, combined with a slimmed-down and lighter JAKT JD224 appearance, as well as a 45 mm diameter and 290 g lightweight. This is what the 224 mm over-barrel LITE version of the all-rounded, hunting classic silencer offers. So if you want to protect your ears effectively with lightness and only a small weapon extension of 140 mm, opt for this technical solution. However, JD224 LITE is only available in one length and not as a colourful variation, but still available with the additionally integrated XTRM steel mesh for even more damping performance.

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.
[dB*] The measurement for all silencer models was carried out in reference to the calibers .22 l.r. | .308 Win | .300 Win. Mag. The highest value determined per product line is indicated.

HAUSKEN SILENCERS

HAUSKEN has specialized in the development and manufacturing of moderators since 1992 – offering more than thirty years experience. HAUSKEN silencers are manufactured on the most modern machines available. All parts are hard anodized for maximum durability. The sophisticated design, precise manufacturing and high-quality materials guarantee a maximum of sound moderation while maintaining low weight and compact dimensions.

JAKT SUPER KOMPAKT

MASTER THE POWER OF STILLNESS

THE COMPACT HIGH TECHNOLOGY

The JAKT SUPER KOMPAKT on-barrel silencer version of the JAKT series allows you to leave the open sights on the rifle. So that you can continue to concentrate on the essentials. Six pressure distribution chambers in front of the muzzle provide very good sound attenuation of up to -29 dB* and protect the ears of the user, those of his companion and those of his dog with lasting success. And all this with a small rifle extension of 156 mm.

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.

[dB*] The measurement for all silencer models was carried out in reference to the calibers .22 l.r. | .308 Win | .300 Win. Mag. The highest value determined per product line is indicated.

MASTER THE POWER OF STILLNESS

JAKT JD224Ti HYBRID TITAN

A CONSUMMATELY VERSATILE HUNTER – OPTIMISED TO HANDLE EXTREME LOADS

The tried-and-tested JD224 from the HAUSKEN JAKT product line, loved by many the world over, now also comes in an exceptionally durable titanium core variant. The JAKT JD224Ti HYBRID TITAN silencer offers unsurpassed quality, performance and practicality. Thanks to its hard-anodised and reinforced aluminium housing, as well as its indestructible grade 5 titanium core, the silencer is also suitable for magnum calibers and rapid bursts of fire. This means that it can now finally be used at a simulator or shooting range! The 50-mm diameter allows for optimal gas distribution inside the silencer, thus ensuring a balanced sound pressure level reduction of around -30 dB, while the rifle, thanks to a barrel extension of just 140 mm and the tried-and-tested HAUSKEN over-barrel design, continues to offer precise and easy handling, even when moving.

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.

[dB*] The measurement for all silencer models was carried out in reference to the calibers .22 l.r. | .308 Win | .300 Win. Mag. The highest value determined per product line is indicated.

JAKT WHISPER

MASTER THE POWER OF STILLNESS

THE BEST OF BOTH WORLDS

The JAKT WHISPER series is, as the name suggests, the perfect synergy of the two very popular and powerful designs - robust and agile at the same time. The larger diameter of 60 mm, the still low weight, the over-barrel design and the additional volume allow a very good, increased effect of up to -38 dB. The design does not interfere with the scope when hunting. Hard anodized inner and outer tubes make these silencers particularly durable. The JAKT WHISPER series is suitable for rifles with a barrel diameter of up to 23 mm. Six pressure distribution chambers and the additional expansion chamber ensure a balanced pressure distribution inside the silencer. This means that when the bullet is fired, there is hardly any muzzle flash, which would otherwise disturb and blind the user. The perfect solution for all hunting applications even at longer distances.

In addition: good magnum suitability!

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.

[dB*] The measurement for all silencer models was carried out in reference to the calibers .22 l.r. | .308 Win | .300 Win. Mag. The highest value determined per product line is indicated.
