

HAUSKEN SILENCERS

HAUSKEN has specialized in the development and manufacturing of moderators since 1992 – offering more than thirty years experience. HAUSKEN silencers are manufactured on the most modern machines available. All parts are hard anodized for maximum durability. The sophisticated design, precise manufacturing and high-quality materials guarantee a maximum of sound moderation while maintaining low weight and compact dimensions.

MINI

MASTER THE POWER OF STILLNESS

THE SMALL AND EFFEKTIVE

With diameters of 35 and 45 mm, the MINI series is the smallest in the high-quality HAUSKEN silencer collection. The on-barrel design for the use of open sights, the compact construction and the low weight make them efficient companions even in very active applications. Despite the minimal barrel extension of 128 mm, the user benefits from a significantly reduced muzzle blast noise of over -22 dB*. Better precision and a quality technical experience are thus guaranteed. Protect your ears and those of your hunting team from painful noise levels.

XTRM (X) – Steel mesh lining in the chambers drastically increase the effect. With the XTRM Mesh, the user is one-step closer to complete silence.

[dB*] The measurement for all silencer models was carried out in reference to the calibers .22 l.r. | .308 Win | .300 Win. Mag. The highest value determined per product line is indicated.

[i.O.] individual order.

Hausken products are not yet available in all countries. Please ask your dealer.
Please observe the current laws of your country for the purchase and use of silencers.
